

POLICY

OCCUPATIONAL SAFETY, HEALTH AND ENVIRONMENT

Universiti Teknologi Malaysia is committed towards establishment and implementation of an effective Occupational Safety and Health Management System to continually improve our performances, minimization of hazards and prevention of accident and injuries in the premises for all our activities during routine and non-routine operation.

OUR COMMITMENT

1. PREVENTION OF ACCIDENT/INCIDENT, INJURIES AND POLLUTION

- Establish a proactive system which can provide safe and healthy working conditions for the prevention of work-related injury, ill health, eliminate hazards and reduce risks to our employees, students and the public.
- Protection of the environment including prevention of pollution and conservation of resources.

2. IMPROVEMENT

- Continually improve the effectiveness of our safety and health management system through setting up the framework for occupational safety and health objectives and also establishing an environmental objectives and programs.

3. COMPLIANCE

- Commit to comply with all applicable Safety, Health and Environmental legislations and other legal requirements.

4. COMMUNICATION

- Communicate environment and also occupational safety and health issues to all our employees, students and other interested parties.
- Provide mechanisms for consultation and participation of employees in occupational safety and health issues.

5. SAFETY CULTURE

- Nurture a safe working culture guided by understanding, responsibility and self regulation.
- Inculcate safety and health awareness among our employees and students about the importance of managing their safety and health.
- Provide occupational safety and health training in order to improve their awareness about the applicable impacts and risks from all activities.

This policy shall be distributed and made available to all employees, students and interested parties and shall be reviewed from time to time.
