FEATHER IN THE CAP FOR UTM FACULTY

THE Civil Engineering Faculty of Universiti Teknologi Malaysia, which has always practised the cooperation concept of "One Big Happy Family", won the university's top honours during its recent Excellence and Appreciation Awards gathering.

Faculty dean Prof Dr Shahrin Mohammad said receiving the Vice-Chancellor Quality Award was another feather in the faculty's hat. The faculty also obtained accreditation in the engineering field last year, besides being a centre for engineering research at national level. It has also achieved two ISO quality certification for teaching and academic management and for setting up a quality management system. It is also constantly working to increase the number of published academic research. "It is the first faculty to introduce its own management system that facilitates teaching, learning and grading. This outcome-based education system also lightens the burden of staff and maintains the research output," said Shahrin.
